

Gunnebo Lifting Chain & Components

The Grade 10 and Grade 8 Range

Our large range of chain and components have been designed and developed over time to meet various requirements.

The following pages give an introduction to our chain and components range in grade 10 and grade 8.

Lifting Is Our Business

Gunnebo Lifting is a company standing on a solid foundation, created from centuries of experience and an ability to adapt to the needs and demands of the lifting industry. We take great pride in developing, manufacturing and marketing products of highest quality and functionality, supplying our customers with lifting gear that increase flexibility and efficiency.

Quality and safety have been, and will continue to be, our top priorities. Every single component we manufacture, as well as every chain link, is proof loaded 2.5 times their working load limit and then thoroughly examined by our competent personnel. This enables us able to feel fully confident in the products that we put on the market.
